Education

Bharathidasan University   September 2022 – June 2025
Bachelor of Computer Applications-CGPA:8.0

Projects

Sign-In Page Website | *Using Languages: HTML , CSS*[Live Link]   **June 2025**
- This project showcases the power of front-end web development in creating "user-friendly" interfaces.
- Common elements include input fields for username/email and password, a submit button, and potentially options like "Forgot Password" or social login integrations.
- Sign-in pages play a vital role in protecting user accounts and sensitive data by requiring strong passwords and potentially implementing two-factor authentication.
- A well-designed sign-in page is crucial for a positive user experience, ensuring it's easy to navigate, understand, and complete the login process quickly and efficiently.

Profile Card Design Website | *Using Languages: HTML,CSS*[Live Link]   **June 2025**
- A circular or well-positioned avatar creates a personal touch.
- Clear and accessible information, such as email, phone number, and join date, is crucial.
- Interactive Elements:- Buttons for actions like following, connecting, or learning more can enhance engagement.
- Social Media Links:- Icons or buttons linking to the user's social media profiles.Hover Effects and Animations:- Adding subtle animations or hover effects can improve the user experience and make the profile card more dynamic.

Employee Record Management System | *Using Languages: HTML , CSS, PHP, MySQL*   **March 2025**
- Employee Record Management System is a software application designed to centralize, organize, and manage employee data throughout their lifecycle within an organization.
- Centralized Data Storage:-Provides a secure and accessible platform for storing all employee-related information in one place, eliminating the need for physical files.
- Increased Security:-Protects sensitive employee data from unauthorized access and potential breaches, ensuring both privacy and confidentiality.

Personal Portfolio Website | *Using Languages: HTML , CSS*   **March 2025**
- A personal portfolio website is a professional digital platform designed to showcase an individual's work, skills, achievements, and expertise to potential employers, clients, and collaborators.
- It serves as both an online résumé and a curated project gallery, offering a centralized, accessible platform to present one's expertise to potential employers, clients, and collaborators.
- The primary objective is to effectively highlight the individual's skills, experience, and accomplishments.
